No improvement needed

A

Better

No Suggestions

Great teaching

Should be focused more on practical knowledge.
Lab should be more advanced.
Teachers should be known with new technologies.

Everything is good

Overall good

It's good

Everything is good

Yes

Okay

- 1) Provide unit notes before teaching
- 2) Create all subject Google classroom for learning
- 3) provide unit teaching videos.

all are best

Teaching

Thanks for giving us this opportunity

Overall my institute is excellent,

But I recommend that the teacher or staff

Should pay more attention towards the weak students and know their mental health, guide them motivate them,

As many students come from different place from different cities to study here

Far from home as a result they are free to do anything without letting their parents know about that, at this age students come in wrong contact and make their life miserable and negative, as a result they

Face depression, anxiety!!... and may take wrong step!!!!

Overall my institute is excellent 😊

Change teacher staff

Yes

Embrace technology integration for interactive and dynamic learning.

Foster collaborative and experiential learning activities.

Provide personalized support and feedback to cater to individual student needs.

All perfect

Everything is great according to me

More explanation and problem solving is required

There are no clubs for IT department. This is very discouraging.

Overall teaching and learning method in our institute is great.

Make students think .

Don't just give assignments for writing.

It just makes people brain dead.

- 1) Make subjects interesting to study
- 2) Prepare/Know their subjects well before conducting a lecture
- 3) Teach with interest and enthusiasm and keep an energetic environment

Teaching is the best.

The only one thing I observed is that lack of communication between teacher and student.

Teaching is very good so no need to give any suggestions on that. And talking about the learning experience, I'm glad that I'm part of this institution which connects their students to real time updates regarding industries and what knowledge, skills we should learn to fit in outside world.

There should be at least 3 lectures on the prerequisite concepts that are required by the particular subject in the university curriculum.

They should understand by students performance

Everything is perfect

Should check if all students in group are working towards the completion of project or just few of them

Should tell the schedule about viva n exams in prior

Should encourage students to explore more beyond the syllabus course

all students to participate in a placement program not only selected students

Practicals should be explained more

Teachers should encourage extracurriculars

Teachers should consider students problem genuinely

Everything is best

Teach every topic, discuss important questions, explain everything properly

1. With the software-world being fast paced, the professors lack knowledge about recent updates, therefore showing incompetence in the ability to guide students.
2. >60% of students are defaulters and don't attend classes. The reason being that teachers just read slides from the projector screen or just read through the textbook. This is something even we students can do on our own.
3. Students always look forward to attend classes of professors that make their respective subject fun and easy to understand. If you need to force students to attend your class, then you need to change your approach at teaching.

The learning experience was satisfactory

No objection

- 1) Most of the teachers are so rude with students, even you are talking politely to them.
- 2) Teachers don't want understand problems of student and provide solutions to them, they only know how to release their family frustration on students.
- 3) Almost 40% of teaching staff don't know how to teach students in properly and this is the reason students don't want to come to college.
- 4) please increase your attention and quality of teaching

Embrace blended learning for a more engaging experience.
Foster a student-centered environment to encourage active participation.
Invest in teacher professional development for effective instruction.

Teacher must know all the programmes which he/ she gives to us
